Others

Lastly, we thank the many colleagues who played an important role in shaping the ideas and concepts in MAMI. Space does not allow us to name the numerous email, meeting and e-discussion group correspondents in person; however we would like to mention in particular all participants at the Infant Feeding in Emergencies Regional Strategy Workshop held in Bali, Indonesia, March 2008. We hope there will be opportunities to work together more closely in the future as we continue to advance the care of this vulnerable group of infants.
